

Roadside Weeds and Pests Program Control Plan 2023-2026

1: Council Name: MOYNE SHIRE COUNCIL

2: Contact Details:

Name: RHIANNON FISCHER

Position: ENVIRONMENT & BIODIVERSITY OFFICER

Telephone: 1300 656 564

Email: rhiannon.fischer@moyne.vic.gov.au

3: Regional context of noxious weed and pest animal management:

Moyne Shire is located in South-West Victoria and stretches from along the Shipwreck Coast in the South to the pastoral areas in the North. Moyne Shire spans a large (5,478km²) area but has a small (17,370) human population. Moyne Shire's communities include the larger (<2500) rural townships of Port Fairy, Koroit, Mortlake and Macarthur; the smaller (<500) rural settlements of Hawkesdale, Peterborough, Woolsthorpe, Caramut, Nullawarre, Panmure and Yambuk; and rural communities (<250) of Hexham, Kirkstall, Winslow, Purnim, Wangoom, Ellerslie, Bessiebelle, Garvoc, Codrington, Framlingham, Woorndoo, The Sisters, Knebsworth, Nirranda, Killarney, Naringal, Laang, Toolong, Willatook, St. Helens, Minhamite, Mailors Flat, Ballangeich, Dundonnell, Nareeb, Grassmere, Minjah, Ayrford, Mepunga, Rosebrook, Yangery and Illowa.

The landscape of the municipality is dominated by its major industry in agriculture, with manufacturing, tourism, retail, and education other important economic sectors. Dairying is the highest value agricultural industry, though fishing, sheep, cropping, and timber are growing in size and value.

Moyne Shire predominantly consists of the Victorian Volcanic Plain (VVP) bioregion, which encapsulates the Warrnambool Plain bioregion. These bioregions contain endangered grasslands, some of which remnants of native species can still be found present in roadside reserves.

There are 3,564km of roads within Moyne Shire of which Council is the responsible authority for approximately 2,961km and VicRoads is responsible authority for approximately 603km. Of the roads that are Council's responsibility, around half (1,573km) are bitumen sealed roads, with the remaining consisting of earth foundation.

Council is committed to the control of pest plants and animals on land under its management responsibility and has been proactive in implementing an ongoing program for priority works each year since 2008. Over the last two years Council has been implementing actions from within its Roadside Weed and Rabbit Control Plan 2022-2023 that saw substantial weed control works along designated rural roadsides across the municipality for priority (Regionally Controlled) weed species such as Gorse, Blackberry, Boxthorn and Rabbits.

4: Community Consultation:

Moyne Shire Council has employed a dedicated Environment Officer since August 2001. This officer has worked extensively with the many small communities in Moyne on an array of projects in this time, building trust with the community and a strong network of key community contacts. Since 2008 the Environment Officer role has progressively taken on greater weed control responsibilities to the extent that this position now performs the vast majority of weed control on all Council managed land.

Moyne's Environment & Biodiversity Officer attends several community meetings each calendar year dealing with various Natural Resource management issues – including weed control. Community groups, ratepayers and individuals within the municipality are encouraged to make service requests for weed control works to the Environment Officer and records are kept detailing the nature of the request and the action that has been taken by Council. Council actively maintains a database of locations where weed control works have been performed since 2008 and seeks to return to these locations regularly for follow up treatments.

Landholder and members of the community are encouraged to submit service requests via customer service, email, or Moyne Shire website forms to report weed locations along roadsides. These are added to the database for ongoing treatment and monitoring locations.

5: Stakeholder Consultation:

In developing the 2023-2026 Plan, Moyne Shire Council approached a range of state agency officers, non-government organisation staff, weed control contractors and key local Landcare group representatives for the feedback and discussion on its formulation. Moyne Shire's Environment & Biodiversity Officer liaised with organisations on specific matters such as rabbit control and coordinating weed treatments, including the following:

Department of Environment Energy and Climate Action (DEECA)

Glenelg Hopkins Catchment Management Authority (GHCMA)

Nature Glenelg Trust

South West Vermin and Weed Control

Australian Plants Society- Warrnambool

Warrnambool Field Naturalists

Woorndoo-Chatsworth Landcare Group

Basalt-to-Bay Landcare Network

RJT Vermin Control

Warrnambool Coast Care / Landcare Network

Corangamite Shire Council

Moyne Shire Community

6: Relevant Policies, Strategies and Submissions:

Moyne Shire Council is aware of the following policies and strategies that have some relevance to this Plan:

State

- Catchment and Land Protection (CaLP) Act 1994
- Catchment and Land Protection Regulations 2022
- Victorias Biosecurity Strategy 2023
- Invasive Plants and Animal Policy Framework 2010
- Victorian Gorse Control Strategy 2021-2026
- Victorian Blackberry Strategy 2020-2025

Regional

- Glenelg Hopkins CMA Regional Catchment Strategy 2021-2027
- Glenelg Hopkins CMA Invasive Animal Strategy 2010-2015
- Glenelg Hopkins CMA Regional Weed Plan 2007-2012
- Corangamite CMA Regional Catchment Strategy to 2027
- Corangamite CMA Invasive Plant and Animal Management Strategy 2010
- South West Victoria Regional Coastal Action Plan 2002

Local

- Moyne Shire Council Plan 2021-2025
- Moyne Shire Roadside Conservation Plan 2001
- Moyne Shire Environmental Sustainability Strategy 2012
- Coastal and Marine Asset Management Plan 2022

7: Objectives of the Plan:

Moyne Shire Council's key objective for the Plan is to maintain the effective and proactive management of invasive species of concern along specified Council managed roadsides across the municipality. Council will use the funding associated with this plan in order to meet its stated target actions. This will greatly assist Council in containing the spread and overall extent of selected invasive plant and animal species within the municipality.

Funds will be invested according to the following (ranked) priorities:

- 1) Treatment for the containment, or reduction in area, of infestations of Regionally Controlled weeds and rabbits aligned to current and former Agriculture Victoria compliance project areas.
- 2) Supporting coordinated community group investment in declared weed and pest control projects.
- 3) Contributing to other previous investment in the control of Regionally Controlled weeds and rabbits.
- 4) Commencing shire-wide GIS roadside weed mapping to improve targeted treatment to enable updated and current knowledge of Restricted, Regionally Prohibited and Controlled weed infestations and Established Invasive Animals. This will direct future control plan development.
- 5) Protecting identified environmental assets such as areas of significant remnant vegetation from the threat of weed invasion or other significant roadside infrastructure.
- 6) Support weed and pest animal management programs being undertaken by landholders; &
- 7) Addressing other roadside declared noxious weed infestations of concern to the Shire's community including weeds classified as 'Restricted'.

8: Term of the Plan:

The Plan will run for a three-year period from 1 July 2023 to 30 June 2026. It is noted that as weed mapping and GIS systems are updated the control plan will be adjusted to ensure effective control of targeted weeds.

9: Full time equivalent (FTE) resourcing:

The Plan will be funded via the following avenues:

- Victorian Government via its Roadside Weed and Pest Management Program (RWPP) allocation - \$81,519 for 2023/24 financial year, with funding allocations for the 2024/25 and 2025/26 financial years to be announced after the state budget release at the discretion of the Minister for Local Government; &
- Moyne Shire Council weed control operational budget allocation - \$63,000 in 2023/24 (with similar budget allocation requested for 2024/25, 2025/26 and 2026/27).

Internal resourcing and management of contractors is completed in-kind by the Environment & Biodiversity Officer with support of the Environment Services Coordinator totalling approximately 300-350 hours per year.

On-ground weed management works are completed via contractors over multiple weeks across the year totalling approximately 0.5 to 1 FTE.

10: Target Species:

List the species that will be targeted during the duration of this control plan; e.g.

Serrated tussock *Nassella trichotoma* *Regionally Prohibited Weed* 1 *To support Agriculture Victoria compliance programs*

Common Name	Scientific Name	CaLP Act Classification	Priority Rating <i>1 highest - 4 lowest</i>	Reason for Management
AFRICAN BOXTHORN	<i>Lycium ferocissium</i>	Regionally Controlled Weed	2	<ul style="list-style-type: none"> - To support former compliance areas - To support community-led programs - To support previous investment by Council - To protect a known environmental asset
APPLE OF SODOM	<i>Solanum linnaeanum</i>	Restricted Weed	4	<ul style="list-style-type: none"> - To support previous investment by Council - To protect a known environmental asset - To address infestations of community concern
BLACKBERRY	<i>Rubus fruticosus</i>	Regionally Controlled Weed	2	<ul style="list-style-type: none"> - To support former compliance areas - To support community-led programs - To support previous investment by Council - To protect a known environmental asset
BONESEED	<i>Chrysanthemoides monilifera</i>	Regionally Controlled Weed	3	<ul style="list-style-type: none"> - To support community-led programs - To support previous investment by Council - To protect a known environmental asset
CAPE BROOM	<i>Genista monosperulana</i>	Restricted Weed	4	<ul style="list-style-type: none"> - To support previous investment by Council - To protect a known environmental asset - To address infestations of community concern
GORSE	<i>Ulex europaeus</i>	Regionally Controlled Weed	1	<ul style="list-style-type: none"> - To support former compliance areas - To support community-led programs - To support previous investment by Council

				- To protect a known environmental asset
HAWTHORN	<i>Crataegus monogyna</i>	Restricted Weed	4	- To support previous investment by Council - To protect a known environmental asset - To address infestations of community concern
HEMLOCK	<i>Conium maculatum</i>	Restricted Weed	4	- To support previous investment by Council - To protect a known environmental asset - To address infestations of community concern
RABBIT	<i>Oryctolagus cuniculus</i>	Established Pest Animal	1	- To support former compliance areas - To support previous investment by Council - To protect a known environmental asset
RAGWORT	<i>Senecia jacobaea</i>	Regionally Controlled Weed	3	- To support previous investment by Council
RED FOX	<i>Vulpes vulpes</i>	Established Pest Animal	1	- To protect a known environmental asset - To address infestations of community concern
ST JOHN'S WORT	<i>Hypericum perforatum</i>	Regionally Controlled Weed	3	- To support previous investment by Council
SWEET BRIAR	<i>Rosa rubiginosa</i>	Regionally Controlled Weed	4	- To support previous investment by Council - To protect a known environmental asset
WILLOWS	<i>Salix spp.</i>	Restricted Weed	4	- To support previous investment by Council - To protect a known environmental asset - To address infestations of community concern

11: Control Measures and Target Roadsides:

List the control measures and target roadsides; e.g.

Common Name	Control Measures	Location of Proposed Works	Est Length of Roadside to be Treated Annually	Approx Annual Timing of Treatment
<i>Serrated tussock</i>	<i>Spot spray application of a registered herbicide in accordance with the product label</i>	<i>Smith Road, Smithville</i>	<i>5km</i>	<i>Feb – Oct</i>
AFRICAN BOXTHORN	<ul style="list-style-type: none"> - Spray with a registered herbicide in accordance with the product label. - Mechanical removal wherever justifiable, rabbits occur in abundance or herbicide application is inappropriate. 	<ul style="list-style-type: none"> - Any roadside within 8km of the Coastline (excluding boundary hedges) 	120km	Sep – May
APPLE OF SODOM	<ul style="list-style-type: none"> - Spray with a registered herbicide in accordance with the product label. 	<ul style="list-style-type: none"> - Craggs Road, Yambuk - Carrolls Road, Yambuk - Thwaites Road, Port Fairy 	4km	Sep – May
BLACKBERRY	<ul style="list-style-type: none"> - Spray with a registered herbicide in accordance with the product label. - Mechanical removal wherever justifiable, rabbits occur in abundance or herbicide application is inappropriate. 	<ul style="list-style-type: none"> - See attached list for comprehensive details 	270km	Sep – Apr
BONESEED	<ul style="list-style-type: none"> - Cut & Paste method of herbicide application. - Manual hand pulling of small/young seedlings. 	<ul style="list-style-type: none"> - Macs Street, Peterborough - Halladale Street, Peterborough - Macgillivray Road, Peterborough - Old Peterborough Road, Peterborough - Fiji Street, Peterborough 	1km	July – Oct

CAPE BROOM	- Spray with a registered herbicide in accordance with the product label.	- Innumerable roadsides throughout the Shire (only in locations where other weeds are being treated nearby)	60km	Jul – Dec
GORSE	- Spray with a registered herbicide in accordance with the product label.	- See attached list for comprehensive details	50km	Aug – Nov & Mar – May
HAWTHORN	- Drill & Fill / Cut & Paste method of herbicide application where appropriate. - Mechanical removal wherever justifiable.	- Callaghans Road, Nirranda South - Pulham Street, Panmure - Hopkins Falls Road, Wangoom - Spring Flat Road, Wangoom - Askews Road, Wangoom - Three Chain Road, Wangoom - Kents Ford Road, Framlingham East - Gibson Street, Caramut - Degrandis Road, Hawkesdale - Mitchell Street, Hawkesdale - Shider Road, Hawkesdale	10km	Sep – Mar
HEMLOCK	- Spray with a registered herbicide in accordance with the product label.	- See attached list for comprehensive details	8km	Sep – Dec
RABBIT	- Mechanical ripping of warrens &/or - Fumigation of warrens &/or - Removal of exotic vegetative harbour. - Targeted Pindone baiting treatment in coordination with adjacent landholders.	- Mahoneys Road, Killarney - Woodbine Road, Port Fairy - Craggs Road, Yambuk - Hummocks Road, Yambuk - Cains Road, Codrington - Boundary Road, Tyrendarra East - Model Lane, Port Fairy - Greens and Gales Lane, Woorndoo - Towilla Way, Killarney - As identified in areas of concern	20km	Sep – Nov & Mar – May
RAGWORT	- Spray with a registered herbicide in accordance with the product label.	- Hopkins Falls Road, Wangoom	1km	All Year

RED FOX	<ul style="list-style-type: none"> - Baiting with 1080 poison in accordance with the product label and guidelines. - Shooting by a licensed contractor in targeted areas homing vulnerable native fauna. - Den fumigation and destruction completed by a licensed contractor. 	<ul style="list-style-type: none"> - As identified in areas of concern 	1.5km	
ST JOHN'S WORT	<ul style="list-style-type: none"> - Spray with a registered herbicide in accordance with the product label. 	<ul style="list-style-type: none"> - Badhams Road, Killarney - Ripponhurst Road, Warrabkook - Mount Eccles Road, Macarthur - Grauers Road, Allansford 	0.5km	Oct – Dec
SWEET BRIAR	<ul style="list-style-type: none"> - Spray with a registered herbicide in accordance with the product label. - Cut & Paste method of herbicide application where appropriate. - Mechanical removal wherever justifiable. 	<ul style="list-style-type: none"> - Innumerable roadsides throughout the Shire (only in locations where other weeds are being treated nearby) 	30km	Nov – Mar
WILLOWS	<ul style="list-style-type: none"> - Drill & Fill / Cut & Paste method of herbicide application where appropriate. - Mechanical removal wherever justifiable. 	<ul style="list-style-type: none"> - Grassmere Road, Grassmere - Bryan O'Lynn Road, Purnim - Manifold Street, Woolsthorpe - Cooramook Road, Purnim - Macarthur-Hawkesdale Road, Ripponhurst - Mcswains Road, Ballangeich - Codrington-Orford Road, Orford - Atkinson Street, Kiskstall - Warrong Siding Road, Warrong - Hare Street, Yambuk 	0.6km	Sep – Dec & Apr - May

12: Maps:

Provide the following maps to support the control plan information:

- Map 1 Proposed location of control works.
- Map 2 Known infestations of Regionally Prohibited Weeds, Regionally Controlled Weeds, established pest animals and Restricted Weeds.

NOTE: The Moyne Shire Council is currently planning to commence shire-wide weed GIS mapping after 30 June 2024 to update the existing known infestation locations of Restricted, Regionally Prohibited and Controlled weeds. It is intended that a component of the weed control budget will be allocated each year to engage a consultant to undertake this project as part of the 2023-26 RWPP control plan.

The appended proposed location and known infestations map from 2017-2019 will be utilised in the interim to continue weed management within the Shire.
