Surface Legend:

	Driveway/footpaths: granite sand
	Boulders: bluestone
	Garden beds: euky/bush mulch
	Grass: existing lawn
	Concrete: exposed aggregate

Notes:

Footpaths/driveway:
Compacted granite sand topping minimum depth of 100mm on top of 20mm crushed rock base to a depth of 150mm.

Garden beds:
Cultivate all garden areas to a minimum depth of 200mm. Remove all existing grass and rhizomes, then cover with 2 layers of cardboard and wet thoroughly. Install premium quality native friendly garden soil as required. Mulch with 50mm of aged bush/euky mulch.

Optional lighting:
All garden lights to be low voltage and connected to smart plug controllers compatible with WiFi and controlled through mobile devices. Garden lights to be adjustable spike lighting.

Planting:
Supply and install planting materials as indicated on the drawing and as per the planting schedule. All plants to be installed using horticulturally accepted practices and watered thoroughly upon installation. Semi-established trees are to be staked as follows: Use two 1800 x 50 x 50mm hardwood stakes pointed at one end and driven 600mm into the ground. Plants are to be secured to each stake with a figure eight tie of canvas with a minimum width of 50mm. Ties are to be securely attached to stakes.

General notes:
All garden beds, lawns and garden areas will slope away from buildings. The location of all underground and overhead services shall be checked by a contractor prior to commencement of any excavation works. All dimensions and levels shall be verified on site prior to the commencement of any landscape work. The finished surface level of all mulched garden beds is to be below the weeping holes of buildings.
